

Dear Network Partners,

In our continued commitment to improving the programme and the services we offer to our partners and clients, we have launched QR (Quick Response) Code on the Certificates. A QR code consists of black squares arranged in a square grid on a white background, which can be read by an imaging device such as a camera.

A number of participants had had made comments on the certificates especially in regards to including a seal. After exploring, some options we opted to implement the QR code system.

The scanning app can be downloaded from your mobile phone Play Store/App Store and can be used to scan the code.

The details of the code will then be displayed as shown.
